Monthly Report of the Ventura County Air Pollution Control District 

June 2013

Clearing the air on California's pollution study

APCO Mike Villegas wrote this in response to an April 24 article in the Ventura County Star, "Environmental officials name most polluted cities in California"

We at the Ventura County Air Pollution Control District have been receiving inquiries regarding the California state study that evaluated the impact of multiple sources of environmental pollution and identified people who might be most impacted.

The California Environmental Protection Agency developed a tool known as CalEnviroScreen to perform the study. The purpose of this tool is to locate potential areas in the state where cleanup programs should be targeted.

I have been hearing concerns from people regarding the fact that Oxnard and Port Hueneme scored poorly in the state study. I want to give the community some background and perspective on this issue.

As your county air pollution control officer, I want to assure residents of Oxnard and Port Hueneme that air pollution is not the cause of the elevated scores. As a matter of fact, Oxnard and

Port Hueneme scored quite well with respect to smog (ozone pollution). These areas also had average scores for particle pollution and a slightly elevated score for diesel particulate matter.

One area of the study where these areas scored poorly was in pesticide application rates. Of course, Oxnard is a major agricultural production area and one would expect pesticide use in the area.

As your county air pollution control officer, I want to assure residents of Oxnard and Port Hueneme that air pollution is not the cause of the elevated scores

I would like to point out that the pesticide application does not necessarily translate directly into public pesticide exposure. For example, new application

methods for pesticides used for strawberries have reduced emissions.

In addition, air districts are working with the California Department of Pesticide Regulation, along with the California Air Resources Board, on efforts to reduce pesticide exposure.

Another point to consider is that the Oxnard/Port Hueneme area has more industrial facilities than some other areas of the county. This study used the U.S. Environmental Protection Agency's Toxic Release Inventory to evaluate the risk from some of these facilities.

I need to point out that this method is a "30,000-foot view" of toxic risk and not exact at all. In addition, your Air Pollution Control District has programs in place to reduce risk from these facilities.

The Oxnard/Port Hueneme area also scored poorly with respect to clean up sites and most of us are familiar with *(continued on page3)*

APCD Calendar

AIR POLLUTION CONTROL BOARD

Second Tuesday, 11:00 a.m.
Board Chambers
Administration Building
800 South Victoria Avenue
Ventura

Next meetings: June 11,
2013 and June 25, 2013.

APCD ADVISORY COMMITTEE

Fourth Tuesday, 7:30 p.m.
Large Conference Room
669 County Square Drive
Ventura

Next meeting: August 27,
2013

CLEAN AIR FUND ADVISORY COMMITTEE

Anacapa Conference Room
669 County Square Drive,
2nd Floor, Ventura

Next meeting: To Be
Announced

APCD HEARING BOARD

Mondays, 5:30 p.m., as
needed Board Chambers
Administration Building
800 South Victoria Avenue
Ventura

Next meeting: To Be
Announced

SOUTH CENTRAL COAST BASINWIDE AIR POLLUTION CONTROL COUNCIL

Santa Barbara APCD
260 North San Antonio Road
Santa Barbara

For more information, call
Mike Villegas at 645-1440.

Next meeting: To Be
Announced

APCD RULE WORKSHOPS

See Rule Update section.

the Halaco site. However, from my perspective, work has begun to restore this site and it will be completed at some point.

Lastly, the state study analyzed population characteristics such as high school graduation rates, poverty levels and even linguistic isolation that the study associated with increased vulnerability to the effect of environmental pollution. So the study

looked at much more than just pollution exposure.

I do not believe the study should lead people to conclude the Oxnard/Port Hueneme areas are unsafe from a pollution standpoint. However, the study could result in additional cleanup funds being targeted to the Oxnard/Port Hueneme areas to further improve the local environment.

I hope this gives the community some perspective on the study. Your Air Pollution Control District is committed to healthy air for all county residents from Port Hueneme to Simi Valley. We will continue to work to improve the environment for all of Ventura County.

AirLines

Wildfire Smoke Tips. The recent “Springs” fire,” reminds us all to review our safety tips for wildfire smoke. Smoke is made up of a complex mixture of gases and fine particles produced when organic matter burns. The biggest health threat from smoke comes from fine particles that can get into your eyes and respiratory system where they can cause health problems such as burning eyes, runny nose, and bronchitis.

People with heart or lung disease may experience adverse health effects earlier and at lower smoke levels. Also, older adults are more likely to be impacted by smoke. Children are also more susceptible to smoke for several reasons: their respiratory systems are still developing; they breathe more air (and air pollution) per pound of body mass than adults; and they’re more likely to be active outdoors.

The key to protecting yourself and your family is to pay attention to local air quality reports. Our website

at vcapcd.org provides air quality data and advisories. If it looks smoky outside; it’s not a good time to mow the lawn, go for a run or let your children play outdoors. If you are advised to stay indoors, keep your windows and doors closed, unless it’s extremely hot. Run your air conditioner but keep the fresh air intake closed to prevent bringing in additional smoke. Finally, if you are feeling ill from smoke exposure, call your doctor. You may need to leave the area for a period of time.

A fond farewell. It is with sadness that we report the recent passing of local artist,

Chris Martinez, designer of the District’s *Skykeeper Activity Book*. According to public information manager Barbara L. Page, “Over the years, we have distributed 50,000 activity books to county schools and at events. Chris was

enormously talented and did a great job coming up with all the Skykeeper graphics.” Martinez also created many murals throughout the County, including ones for Ventura, Buena, Hueneme, and Royal High Schools.

Diamond Award winners. Diamond awards are presented each year to Southern California companies and individuals who are outstanding in their trip reduction efforts. In Ventura County, the awards are given by the **Ventura County Transportation Commission**. The following awards were presented on May 23. Highest Average vehicle ridership (AVR): **Adventist Media Center**. Second Highest AVR: **Oxnard Walmart**. Special Recognition for Ridesharing: **Waterway Plastics**. Special Recognition for Ridesharing: **City of Ventura**. Honorable mention: **Amgen, Dave Weigel**. The APCD’s **Rule 211** program thanks these recipients for voluntarily taking the extra efforts to reduce employee trips, which helps improve our air quality.

Rule Development Update

Visit www.vcapcd.org/rules_division.htm

Recent Board Actions

Permit Fees (Rule 42 – Revised) On April 9, 2013, the Air Pollution Control Board adopted revisions to Rule 42, Permit Fees, to increase annual permit renewal fee rates by 3.0 percent, effective July 1, 2013. In comparison, the state Consumer Price Index (CPI) increased 6.1 percent since the last time these fee rates were revised in 2011. Permit fees were not increased in 2012. For most permittees, this increase in permit renewal fee rates will increase their permit renewal fees by \$16.00 per year. For additional information, contact **Chris Frank** at **805/645-1409** or chris@vcapcd.org.

Rule Workshops

Rule 74.31, Metalworking Fluids and Direct Contact Lubricants

District staff will conduct a public workshop on proposed new Rule 74.31, which is based on South Coast AQMD Rule 1144. Staff is proposing to reduce Reactive Organic Compound (ROC) emissions from the use of metal working fluids and direct contact lubricants. Staff has estimated ROC emission reductions of 41 tons per year, and the cost-effectiveness is \$0.40 per pound of ROC reduced based on SCAQMD estimates. The meeting notice and rule summary may be downloaded below.

The public consultation meeting will occur in the first floor meeting room at 2:30 p.m. on Monday, July 1, 2013, at the Ventura County Air Pollution Control District offices, 669 County Square Drive, Ventura, CA 93003.

Please direct any comments, questions, or requests for additional information to Stan Cowen at (805) 645-1408. Written comments may be mailed to 669 County Square Drive, Ventura, CA, 93003, faxed to (805) 645-1444, or e-mailed to stan@vcapcd.org.

Rule 54, Sulphur Compounds

District staff will conduct a public workshop on proposed revisions to District Rule 54, Sulfur

Compounds. Staff is proposing to add the 2010 sulfur dioxide (SO₂) National Ambient Air Quality Standard (NAAQS) as a ground or sea level concentration limit to the rule's current concentration limits based on the California ambient air quality standards (CAAQS) for SO₂. Staff also proposes adding a description of the design value that must be calculated to compare to the 2010 SO₂ NAAQS concentration limit to determine compliance with the rule.

The public workshop will occur in the first floor meeting room at 2:00 p.m. on Wednesday, August 7, 2013, at the Ventura County Air Pollution Control District offices, 669 County Square Drive, Ventura, CA 93003.

Please direct any comments, questions, or requests for additional information to Tyler Harris at (805) 645-1407. Written comments may be mailed to 669 County Square Drive, Ventura, CA, 93003, faxed to (805) 645-1444, or e-mailed to tyler@vcapcd.org.

Compliance Dates

January 1, 2013 and January 1, 2014

Large Water Heaters and Small Boilers (Rule 74.11.1 – Revised): Effective January 1, 2013, units for sale from over 400,000 BTUs/hr up to 1 million BTUs/hr must meet a NO_x limit of 20 ppm. Effective January 1, 2014, all units for sale from 75,000 BTUs/hr to 400,000 BTUs/hr (except pool heaters) shall meet a NO_x limit of 20 ppm. Pool heaters are still required to meet the existing NO_x limit of 55 ppm. This rule only applies to natural gas-fired units.

These new NO_x limits are based on existing requirements in the South Coast AQMD. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

January 1, 2013

Boilers, Steam Generators, and Process Heaters (Rule 74.15.1 – Revised): Effective January 1, 2013, all new units (1 to 2 million BTUs/hr) must meet a NO_x limit of 20 ppm.

New units must be certified by the South Coast AQMD requirements outlined in South Coast AQMD Rule 1146.2. Source testing must be performed at initial installation and every 4 years thereafter for boilers in this size range. Annual screening for NOx and CO emissions is required except when a source test of the unit is performed.

Requirements for screening notifications, test methods, and reports are described in a Compliance Assistance Advisory on the District's website. For additional information, contact **Lyle Olson** at **805/645-1413** or lyle@vcapcd.org.

December 1, 2012

Aerospace Assembly and Component Manufacturing Operations (Rule 74.13 – Revised): Effective December 1, 2012, the ROC composite vapor pressure limit for coating application equipment cleaners was lowered from 45 mm Hg to 5 mm Hg at 20°C. There continues to be a requirement for operators to use an enclosed spray gun cleaner or low emission spray gun cleaner. Also, this rule still does not apply to aerospace cleaning performed inside a degreaser.

These amendments to Rule 74.13 were based on an All Feasible Measures requirement pursuant to the California Clean Air Act. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

December 1, 2012

Adhesives and Sealants (Rule 74.20 – Revised): Effective December 1, 2012, the ROC content limit is 25 grams per liter for substrate surface preparation (except for inkjet printer head assembly), solvent cleaning, and spray equipment cleaning used in adhesive operations.

These amendments to Rule 74.20 were based on an All Feasible Measures requirement pursuant to the California Clean Air Act. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

December 1, 2012

Marine Coatings (Rule 74.24 – Revised): Effective December 1, 2012, the ROC content limit is 25 grams per liter for substrate surface preparation, solvent cleaning, and spray

equipment cleaning used in marine coating operations.

These amendments to Rule 74.24 were based on an All Feasible Measures requirement pursuant to the California Clean Air Act. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

September 11, 2012

Boilers, Steam Generators, and Process Heaters (Rule 74.15.1 – Revised): Effective September 11, 2012, all units (1 to 5 million BTUs/hr) with an annual heat input greater than 1.8 billion BTUs must be screened annually for NOx and CO emissions. Source testing is still be required every two (2) years for boilers between 2 and 5 million BTUs/hr, and screenings are not required when a source test is performed.

Requirements for screening notifications, test methods, and reports are described in a Compliance Assistance Advisory on the District's website. For additional information, contact **Lyle Olson** at **805/645-1413** or lyle@vcapcd.org.
