

SKY LINES

Monthly Report of the Ventura County Air Pollution Control District 

January 2014

What's new online for 2014

The New Year brings opportunities and challenges for us all. Here at the District, one of the challenges is expanding our "virtual" life. So, for 2014, the APCD has recently created a Facebook page and some new YouTube videos in an effort to reach the public through social media.

Now on Facebook

The Air Zone campaign has taken a leap into cyberspace with the launch of a Facebook page last month. According to public information manager Barbara L. Page, "We have created the Air Zone page to give the public information on green living, thereby not only improving air quality and climate change, but the overall environment as well. We will also give updates on local air quality in our County and provide links to many environmental sites.

We are enthusiastic about this venture and hope Skylines readers will friend the the Air Zone page." It can be reached at <https://www.facebook.com/TheAirZone>.

And new Air Streams videos

This January, the District has created three new videos for the Air Streams section of our website. The videos feature what local companies and schools are doing to help our environment.

Tomatoes improving the air?

Well, that's what the owner of Houweling's Tomatoes in Camarillo thinks. According to Casey Houweling, the company's respect for the planet inspires them to innovate and invest in green business practices. Some of those practices include: five acres of photovoltaic solar panels providing one megawatt of electricity that is equivalent to removing 300 cars from the road; water conservation with a four acre on-site retention pond; reduced use of fossil fuels by collecting heat from refrigeration equipment, solar thermal and irrigation

water for use in heating the greenhouses; and recycling 90 percent of waste. According to Houweling, the latest innovation is the

Filming Casey Houweling in one of the company's tomato greenhouses

Company's new 13.2 megawatt heat-and-power cogeneration technology. It is the first of its kind in the United States to capture traditionally wasted heat, water and CO₂ for use within the greenhouse. This technology well
(continued page 3)

Happy 2014

to all our

Skylines readers

APCD Calendar

AIR POLLUTION CONTROL BOARD

Second Tuesday, 11:00 a.m.
Board Chambers
Administration Building
800 South Victoria Avenue
Ventura

Next meeting: January 14, 2014

APCD ADVISORY COMMITTEE

Fourth Tuesday, 7:30 p.m.
Large Conference Room
669 County Square Drive
Ventura

Next meeting: To Be Announced

CLEAN AIR FUND ADVISORY COMMITTEE

Anacapa Conference Room
669 County Square Drive,
2nd Floor, Ventura

Next meeting: To Be Announced

APCD HEARING BOARD

Mondays, 5:30 p.m., as needed
Board Chambers
Administration Building
800 South Victoria Avenue
Ventura

Next meeting: To Be Announced

SOUTH CENTRAL COAST BASINWIDE AIR POLLUTION CONTROL COUNCIL

Santa Barbara APCD
260 North San Antonio Road
Santa Barbara

Next meeting: To Be Announced

For more information, call Mike Villegas at 645-1440.

exceeds the company's power needs allowing it to supply electricity to the grid. For its efforts, Houweling's Tomatoes was the recipient of the 2011 California Governor's Environmental and Economic Leadership Award.

Ojai high school teaching a green lesson

Another new video features the efforts of the Ojai Valley School in Upper Ojai. In April 2013, the school received a Climate Action Award from Ventura County for making significant contributions to combat climate change. The school installed a photovoltaic system that supplies at least 85 percent of the school's needs. The project reduces its annual carbon footprint by an estimated 690,000 pounds.

Director Sandra Holden interviews Ojai Valley School students about their green practices

The solar project, launched in partnership with HelioPowet and Southern California Edison, comprises 1,001 solar

panels and is the largest solar project in the Ojai Valley. Environmental Science instructor John Wickenhaeuser says the project is also used to teach students math, science and computer skills. In addition to the panels, other "green" efforts include a campus-wide lighting retrofit and water conservation and waste reduction measures.

People protect what they love

Water & air together

Cherryl Connally, co-owner of Island Packers in Ventura Harbor, often cites this Jacques Cousteau quote: People protect what they love. And Island Packers is doing just that. The company has been taking people out to the Channel Islands for education, recreation, and research since 1968. Connally and her staff are committed to protecting the ocean and all natural resources by doing projects that, as she says, "Make a difference." According to her, all of their boat engines and generators are efficient, clean burning Tier II diesels. The hulls of the catamarans are designed

using advanced computer programs to make them very efficient.

All lighting is low energy LED or fluorescent. The paper products used on the concessions on the

Island Packers vessel, "Islander," headed out to Channel Islands National Park & Marine Sanctuary

boats are made from recycled paper and utensils from a compostable corn-based material. Cleaning products used are biodegradable and organic food is offered in their galleys. They have a comprehensive recycling program and are working with various research organizations to help monitor seabird populations and toxins in the marine environment.

So, get into green living and check out the new AirStreams videos online in January and don't forget to friend the Air Zone Facebook page.

AirLines

State's carbon footprint calculator ready for download. The **California Air Resources Board** (ARB) has released a mobile application that aims to inspire people and small businesses to reduce their carbon footprints.

The free CoolCalifornia app, available for download on both the iTunes App Store and Google Play Store, offers

individuals and small businesses a straightforward, easy-to-use tool for calculating their carbon footprint and making pledges to reduce their carbon footprint by, for example, riding a bike more often or turning off the lights.

Using the calculator is simple. App users respond to a number of questions, such as: How many miles per gallon does your car get? How much do you spend per

month on electricity and gas? The result is calculated in the amount of carbon pollution generated in one year by those inputs. The app, which is compatible with Apple and Android devices, features green-living tips and allows users to share personal stories about how they're reducing their climate impact. For more information, contact Melanie Turner at the ARB at 916/322-2990.

FOCUS on climate change

Much international agreement - and some disagreement - on the causes of climate change

According to the California Governor's Office of Planning & Research, the following is a partial listing of scientific organizations that hold the position that climate change is caused by human action.

- Academia Chilena de Ciencias, Chile
- Academy of Athens
- Academy of Science Mozambique
- Academy of Science South Africa
- Academy of Sciences of the Czech Republic
- American Astronomical Society
- American Society of Civil Engineers
- American Public Health Association
- Australian Coral Reef Society
- British Antarctic Survey
- Australian Institute of Physics
- Cameroon Academy of Sciences
- Center for International Forestry Research
- Chinese Academy of Sciences
- Cuban Academy of Sciences
- European Science Foundation
- French Academy of Sciences
- German Academy of Natural Scientists Leopoldina
- International Union of Pure and Applied Physics
- Islamic World Academy of Sciences
- Kenya National Academy of Sciences

- Latvian Academy of Sciences
- National Academy of Sciences, USA
- National Science Foundation
- Natural Environment Research Council, UK
- Nicaraguan Academy of Sciences
- Palestine Academy for Science and Technology
- Romanian Academy
- Royal Irish Academy
- Royal Scientific Society of Jordan
- Royal Society of Canada
- Russian Academy of Sciences
- Science Council of Japan
- Scripps Institution of Oceanography
- Sudan Academy of Sciences
- Turkish Academy of Sciences
- World Health Organization
- Zambia Academy of Sciences

For a complete listing, visit http://opr.ca.gov/s_listoforganizations.php.

We note that some other prominent scientists have made comments that the observed warming is more likely attributable to natural causes than to human activities.

Rule Development Update

Visit www.vcapcd.org/rules_division.htm

Air Pollution Control Board

Sulfur Compounds (Rule 54 – Revised) and Permit Fees (Rule 42 – Revised) On January 14, 2014, the Air Pollution Control Board is tentatively scheduled to consider amendments to Rule 54, Sulfur Compounds, and Rule 42, Permit Fees. Staff is proposing to add the 2010 sulfur dioxide (SO₂) National Ambient Air Quality Standard of 75 ppb SO₂ to Rule 54 as a ground or sea level concentration limit, with a description of the design value and compliance demonstration options. In addition, staff is proposing to clarify the SO₂ combustion emission limit by adding requirements to calculate the exhaust concentration of SO₂ on a dry basis and correct for a percent oxygen content based on the emission source. Staff is also proposing to clarify the method of calculating the planned flaring excess emission fee in Rule 54 and Rule 42 for consistency. The meeting notice, proposed amended rules, and staff report may be downloaded from the District's website at http://www.vcapcd.org/rules_division.htm#54. For additional information, contact **Tyler Harris** at **805/645-1407** or tyler@vcapcd.org.

Recent Board Actions

Metalworking Fluids and Direct Contact Lubricants (Rule 74.31 – New) and Exemptions from Permit (Rule 23 – Revised) On November 12, 2013, the Air Pollution Control Board adopted new Rule 74.31, Metalworking Fluids and Direct Contact Lubricants, to reduce Reactive Organic Compound (ROC) emissions from the use of metal working fluids and direct contact lubricants. On that same date, the Air Pollution Control Board adopted amendments to Rule 23, Exemptions from Permit, to exempt sources using Super Compliant Materials (50 g/l ROC or less) from permit requirements. Metal forging operations will continue to require APCD permits. The adopted new Rule 74.31 and amended Rule 23 and staff report may be downloaded from the District's website at http://www.vcapcd.org/rules_division.htm#7431. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

Advisory Committee

No Advisory Committee meetings are currently scheduled.

Compliance Dates

Metalworking Fluids and Direct Contact Lubricants (Rule 74.31 – New): Effective January 1, 2014, no person shall use any metalworking fluid, vanishing oil, or direct-contact lubricant with an ROC content in excess of the limits specified in Subsection B.1 of the rule. However, if a metalworking fluid was purchased prior to January 1, 2014, it may be used until January 1, 2015, in order to allow users to deplete existing inventories. The prohibition of sale and distribution of noncomplying fluids will become effective on January 1, 2014.

For additional information, contact Stan Cowen at **805/645-1408** or stan@vcapcd.org.

Large Water Heaters and Small Boilers (Rule 74.11.1 – Revised): Effective **January 1, 2013**, units for sale from over 400,000 BTUs/hr up to 1 million BTUs/hr must meet a NO_x limit of 20 ppm. Effective January 1, 2014, all units for sale from 75,000 BTUs/hr to 400,000 BTUs/hr (except pool heaters) shall meet a NO_x limit of 20 ppm. Pool heaters are still required to meet the existing NO_x limit of 55 ppm. This rule only applies to natural gas-fired units. For additional information, contact **Stan Cowen** at **805/645-1408** or stan@vcapcd.org.

Boilers, Steam Generators, and Process Heaters (Rule 74.15.1 – Revised): Effective **January 1, 2013**, all new units (1 to 2 million BTUs/hr) must meet a NO_x limit of 20 ppm. New units must be certified to the requirements of South Coast AQMD Rule 1146.2, Emissions of Oxides of Nitrogen from Large Water Heaters and Small Boilers and Process Heaters. Source testing must be performed at initial installation and every 4 years thereafter for boilers in this size range. Annual screening for NO_x and CO emissions is required except when a source test of the unit is performed.

Requirements for screening notifications, test methods, and reports are described in a

Compliance Assistance Advisory on the District's website at http://www.vcapcd.org/Compl_AA.htm. For additional information, contact **Lyle Olson** at **805/645-1413** or lyle@vcapcd.org.

**Notice of Decision to Certify Emission Reduction Credits
December 2013**

Pursuant to the requirements of California Health and Safety Code Section 40713 and District Rule 26.7.B.4, all interested persons are notified of the Air Pollution Control Officer's (APCO) decision to certify an Emission Reduction Credit (ERC) for the following applicant(s). The proposed ERC is in units of tons per year.

The public may submit written comments on the preliminary decisions during the 30-day period following the date of publication of this notice. The public is welcome to inspect, at the District office, the information submitted by the applicants and the supporting analyses for the preliminary decisions. After reviewing all comments received, the APCO shall provide written notification of the final decision to grant or deny any ERC to any person or agency submitting comments on the proposed ERC during the comment period.

If you have any questions regarding this notice, please contact Kerby E. Zozula, APCD Engineering Manager, at 805/645-1421.

Company	ROC	NOx	PM₁₀	SOx
Vulcan Materials Co. dba Industrial Asphalt Application No. 00025-271 ERC Certificate No. 1235	0.00	1.56	0.00	0.00

The emission reduction will result from an asphalt plant replacement project at the Industrial Asphalt facility located at 6029 Vineyard Avenue in Oxnard. The new asphalt plant has significant lower emissions of NOx as compared to the existing asphalt plant that are eligible for emissions banking. The Permit to Operate for the new asphalt plant requires periodic testing to enforce the emission reduction.

Each balance above represents one or more ERC Certificates. If there is a "Limitation" on a balance, no reactive organic compound or nitrogen oxide emission reduction credits in that balance may be used for emission offsets at a stationary source that has permitted emissions greater than 25 tons per year of that pollutant. (See Rule 26.4.D.3 for details).

A more detailed report is available on the forms page (under Downloads-Permits-ERC Report-Emission Reduction Credits) on the District website (www.vcapcd.org). If you have any questions, please contact Kerby E. Zozula, Engineering Division Manager, at 805/645-1421.
