Old equipment to be replaced:

Circle type of equipment being repowered: farm tractor, construction, or other (specify)
Year, Make, and Model of equipment:
Equipment serial number:

Old Engine to be Replaced:

Year, Make, and Model of engine:
Horsepower of engine:
Engine serial number:
EPA Tier and Family Number:
Annual hours of operation or gallons of fuel consumed*:

***Provide copies of documentation of hours of use or fuel consumed for the previous two years (keep all original documents – documents cannot be returned) by attaching:**

One of the following:

- Copies of dated maintenance or repair documents showing engine hour-meter readings. Attach one document that is dated between April 2017 and April 2018, and one that is dated around April 2019.
- Copy of original signed and dated hour meter log with readings collected a minimum of once per year from an installed and fully functioning hour meter.
- Historical fuel usage documentation specific to the equipment. Fuel documentation must include fuel logs, purchase receipts, or ledger entries.

OR, two of the following:

- Revenue and usage records that identify operational, standby, and down hours for the equipment.
- Employee timesheets linked to specific equipment use.
- Preventative maintenance records tied to specific hours of equipment use.
- Repair work orders specific to the equipment.
- Six months of tracking normal equipment usage with a functional, tamper proof hour meter with prior district approval.
- Other documentation (for review and approval by the California Air Resources Board).

Current hour meter reading: _____ **Date of reading:** _____

Replacement Engine:

Engine Year, Make, and Model:
Horsepower of engine:
EPA Tier Certification:
EPA Family Number:
Engine Cost (\$) **: _____
Installation Cost (\$) **: _____

****Attach itemized price quote from supplier to substantiate claims.**

Off Road Mobile Equipment Repower Application – Page 3

All repowered equipment must be retrofitted with an ARB-verified diesel emission control system (VDECS).

If available for your new equipment, a retrofit can be funded at 100% of its cost. If a retrofit is desired, check this box and enter the total cost in the below table. An itemized price quote detailing the retrofit costs is required. To decline the retrofit, review and sign in the box at the bottom of the page.

VDECS information:

VDECS Make and Model:	
ARB Executive Order Number:	
ARB-Verified NOx reduction percentage:	%
ARB-Verified PM reduction percentage:	%

Costs†:

VDECS cost:	\$
VDECS Installation costs:	\$
VDECS maintenance cost (optional):	\$

†Itemized price quote must be attached to substantiate claims made in this table.

The California Air Resourced Board requires retrofits (also known as VDECS or diesel particulate filters) to be installed on all funded equipment unless the applicant signs a waiver to “opt out” of this requirement and is eligible to opt out. If available for your new equipment, the VDECS may be required and 100% of its cost can be funded by this program. To opt out, sign below to acknowledge that you understand future regulations could require you to have retrofits installed at your own cost. If you want a retrofit now, do not sign below and attach a price quote with details.

Waiver - I choose to opt out of the retrofit requirement.

Applicant Signature: _____ **Date:** _____
