

## Proposed Adjustments to BACT Cost Effectiveness Thresholds for ROC and NOx

District staff will conduct a public workshop to discuss a proposed cost adjustment to the screening levels used to determine Best Available Control Technology (BACT), Best Available Retrofit Control Technology (BARCT) and the cost-effectiveness in Ventura County Air Pollution Control District (VCAPCD) rule development. The screening level used by District has not been adjusted since 1988. Proposed adjustments to BACT are consistent with neighboring air district limits and proposed adjustments to BARCT for NOx is consistent with CPI increase over the same duration and is less than SCAQMD.

The **Public Workshop** will occur at the following time and location:

**Friday, September 13, 2019**  
**3:00 p.m.**  
**Ventura County Air Pollution Control District**  
**669 County Square Drive, 1<sup>st</sup> Floor**  
**Ventura, CA 93003**

Please direct any comments, questions, or requests for additional information to Danny McQuillan at [danny@vcapcd.org](mailto:danny@vcapcd.org) or (805) 645-1432. Written comments may be mailed to 669 County Square Drive, 2<sup>nd</sup> Floor, Ventura, CA, 93003, or faxed to (805) 645-1444.

Comparison of Screening Levels

	Current VCAPCD BACT/BARCT	Proposed VCAPCD BACT	Proposed VCAPCD BARCT
	\$/ton	\$/ton	\$/ton
ROC	\$ 18,000	\$ 30,000	\$ 30,000
NOx	\$ 18,000	\$ 30,000	\$ 39,000
